Drones

Drones are not managed under the jurisdiction of the Victoria Airport Authority. Drones are regulated by Transport Canada.

While YYJ is a no-drone zone, there may be times when drones approved by NAV Canada are flying in the vicinity of the airport.

Reporting a drone

- **Emergency** (imminent danger presented by the drone): call **9-1-1** first.
- **Drone sighted near the airport:** after calling 9-1-1, call the Airport Security Operations Centre at **250-953-7511**.
- **Privacy-related offence** (e.g. being recorded in your home): contact your local police.

Flying a drone

Drones are aircraft, and anyone operating a drone is considered a pilot. When you fly your drone, you're sharing the skies with other drones and aircraft. Before you fly, understand the rules you must follow and review our safety tips.

Flying your drone safely and legally (canada.ca)

Report an unsafe drone use incident

Complete and submit this form if you believe someone is flying a drone in an irresponsible manner without a permit (for example, flying close to other aircraft, near aerodromes, or at a high altitude).
